### School vision statement

At Kempsey High School all students will be successful learners and will learn in an environment of respect, cooperation and fairness. Students will be safe, trusted, valued and supported by staff. Teachers will provide meaningful learning tasks that cater to student’s developing needs. The school will provide quality learning resources and professional learning for the staff. It will enable parents, carers and community agencies to support student learning. The school will recognise the efforts and achievements of its students, parents and staff.

### School context

Kempsey High School has been located on its present site at latitude -31.1 and longitude 152.8 since 1930. The school enrolled 459 students in 2015 which included 144 (32%) Aboriginal students. 111 students (24%) were enrolled in Years 11 and 12.

The school serves public education students from across the Macleay Valley, principally those that live north and west of the Macleay River including those that reside in and around West Kempsey, Frederickton, Willawarrin and Bellbrook.

In 2014 the school had an ICSEA (Index of Community Socio-Economic Advantage) of 850 and a FOEI (Family Occupation and Education Index) of 158. These indices reflect the financial pressures of many of the school’s families. In 2014, 69% of families were in the bottom income quartile and 90% of families were in the bottom half of the four income quartiles.

Kempsey High School is one of two public high schools that make up the 19 member Macleay Educational Community of Schools.

### School planning process

The Kempsey High School Plan 2015-2017 involved collaboration with parents through an open questionnaire distributed at the 2014 Presentation Night and by mail with a reply paid post facility.

257 students completed the Tell Them From Me survey during 2013 and 2014.

The parent feedback and student survey results were shared with staff over a series of meetings during term 1 2015 along with data about student attendance, engagement, attainment and retention.

A draft of the plan was then provided for further consultation for the Student Council, Parents & Citizens Association, the Aboriginal Education Committee and the school staff.
Purpose:
This first strategic direction seeks to put in place a key element of quality teaching which evidence shows will have the biggest impact on improving student learning outcomes.

This element involves teachers and students providing feedback to each other about students’ learning during (rather than at the end of) teaching and learning activities and using this feedback to improve teaching and learning. It provides a process to review diverse student needs, increase expectations, produce a more differentiated curriculum and deliver it with high levels of planning, routines, management and explicit teaching.

Purpose:
This second strategic direction recognises that the most important factor that the school can influence to maximise student learning is the quality of the teaching, administrative and support staff.

It strives to embed professional learning with colleagues into the day-to-day work of all staff.

It uses structured, challenging, stimulating and evaluated teaching – learning programs.

It seeks to make available quality teaching resources including technology in safe, aesthetically pleasing learning spaces.

Purpose:
This third strategic direction seeks to build the Instructional Leadership capacity of the school’s leaders.

Instructional Leadership refers to the actions which leaders at all levels take to bring about improvements in student learning. It encompasses staff professional learning, supportive and collaborative relationships and structures, team work, professional reflection and feedback.

It aligns with and complements the other two strategic directions. Indeed, the other two strategic directions rely on the conscious instructional leadership actions of the school’s leaders.
Strategic Direction 1: Student learning is maximized through use of formative assessment.

Strategic Direction 3: Leaders become better Instructional Leaders

Purpose

Why do we need this particular strategic direction and why is it important?

This third strategic direction seeks to build the Instructional Leadership capacity of the school’s leaders.

Instructional Leadership refers to the actions which leaders at all levels take to bring about improvements in student learning. It encompasses staff professional learning, supportive and collaborative relationships and structures, team work, professional reflection and feedback.

It aligns with and complements the other two strategic directions. Indeed, the other two strategic directions rely on the conscious instructional leadership actions of the school’s leaders.

People

How do we develop the capabilities of our people to bring about transformation?

Student: Contribute to the school’s vision for and effectiveness of student learning by providing feedback as part of formative evaluation processes.

Staff: Collaborating to achieve a shared sense of purpose about the school’s vision for student learning. Developing an individual professional learning plan that is informed by current research and practice about improving student learning outcomes. Applying formative evaluation techniques to improve student learning outcomes.

Parent / Carers: Contribute to collaboration about the school’s vision for student learning.

Evaluation Plan

• Review alignment of the school’s vision for student learning with the purpose of staff professional learning plans and formative evaluation data.

• Audit of formative evaluation processes to determine the degree to which:
  a) learning intentions are clarified, understood and shared;
  b) classroom activities are effectively engineered to elicit evidence of student learning;
  c) feedback is provided that moves learners forward;
  d) students are activated as a learning resource for one another;
  e) students are activated as owners of their own learning.

Processes

How do we do it and how will we know?

• Conversations about the school’s vision for student learning through meetings with parents/carers, student participation in formative evaluation and staff meeting dialogue.

• Staff collaboration with supervisor about individual professional development plan.

• Professional learning about and participation in using formative evaluation as part of the teaching-learning process.

Products and Practices

What is achieved and how do we measure?

• Updated and shared understanding of the school’s vision of student learning among parents/carers, community partners, students and staff.

• Individual staff professional learning plans that meet personal and school needs to address student learning needs.

• Staff and students collaboratively engage in formative evaluation to improve student learning.

Products:

• A current shared school vision for student learning.

• Individual staff Professional Learning Plans.

• Student formative evaluation data.

What are our newly embedded practices and how are they integrated and in sync with our purpose?

Practices:

• Ongoing dialogue about the school’s vision for student learning among students, staff, parent / carers and community partners.

• Staff participation in collaborative goal-setting, observation, evidence collection and evaluation through participation in the performance development framework.

• Ongoing application of formative evaluation techniques within the teaching-learning process.

Improvement Measures

• Alignment of the school’s vision for student learning with the purpose of staff professional learning plans and formative evaluation data.

• Audit indicates that information fed back during formative evaluation is used to improve further student learning.
